

BUILDING MY WEBSITE

Master in AI e Agenti AI per il Business

By Filippo La Greca

PROJECT GOALS

```
g-right: 10px;  
weight: bold;  
low: auto;  
  
login" id="login_form" >  
t color='red'><b>Authentication Failed</b></td></tr>  
"dError1" class="dError1">Please contact the administrator for further  
auth-status>-1</saml-auth-status>
```

Different Steps, One Goal

- Develop a **personal (portfolio) website**
- Showcase **professional background** and **projects**
- Apply **HTML, CSS, Bootstrap** and **Sass**
- Publish the website online through **GitHub Pages**

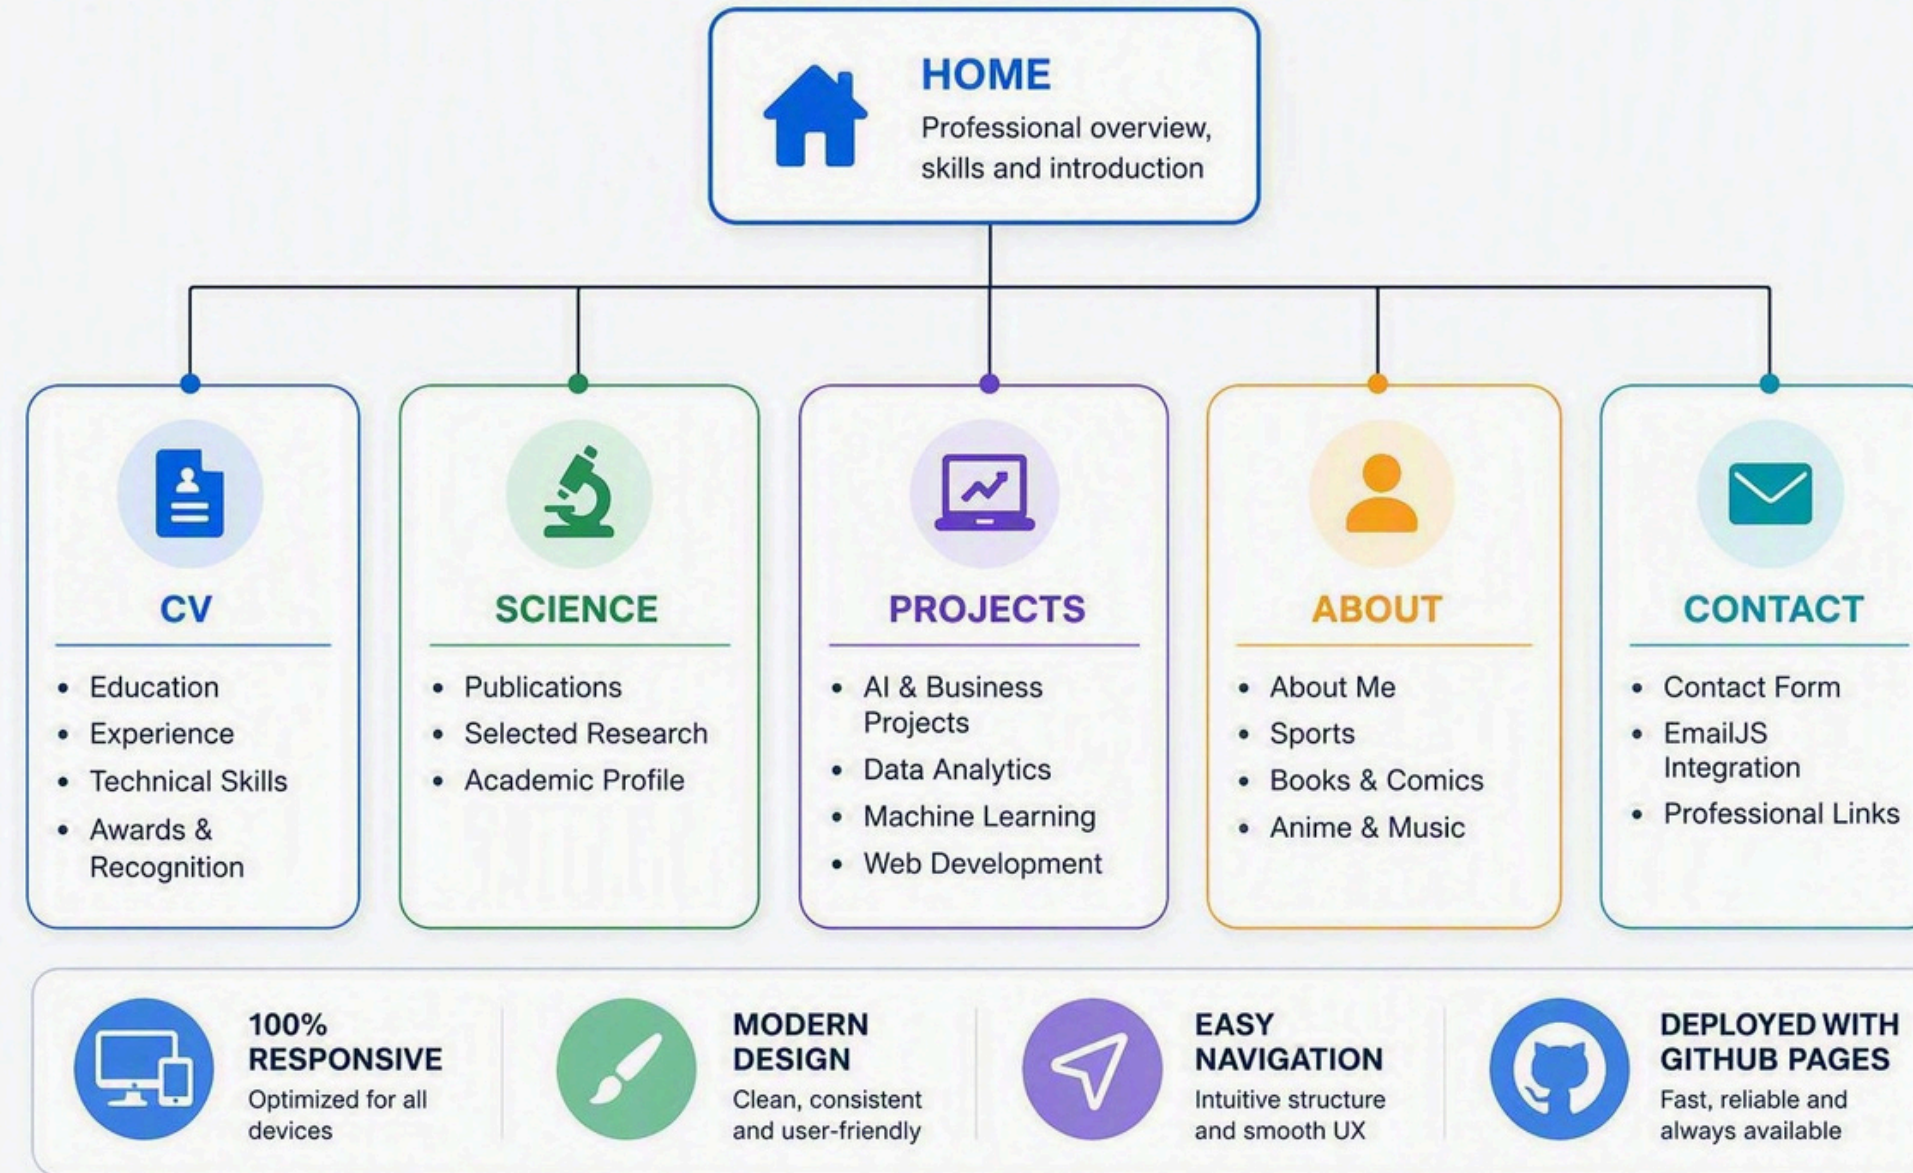

WEBSITE ARCHITECTURE

Designing What Users See

The portfolio is structured around six interconnected sections: **Home, CV, Science, Projects, About and Contact**. This architecture provides a clear separation between professional experience, research activities, technical projects and personal interests, ensuring simple and intuitive navigation.

WEBSITE ARCHITECTURE

TECHNOLOGIES USED

Powering the Website Behind the Scenes

Layout (Front-End Development)

- HTML
- CSS
- Bootstrap
- Sass (SCSS)

Development Tools

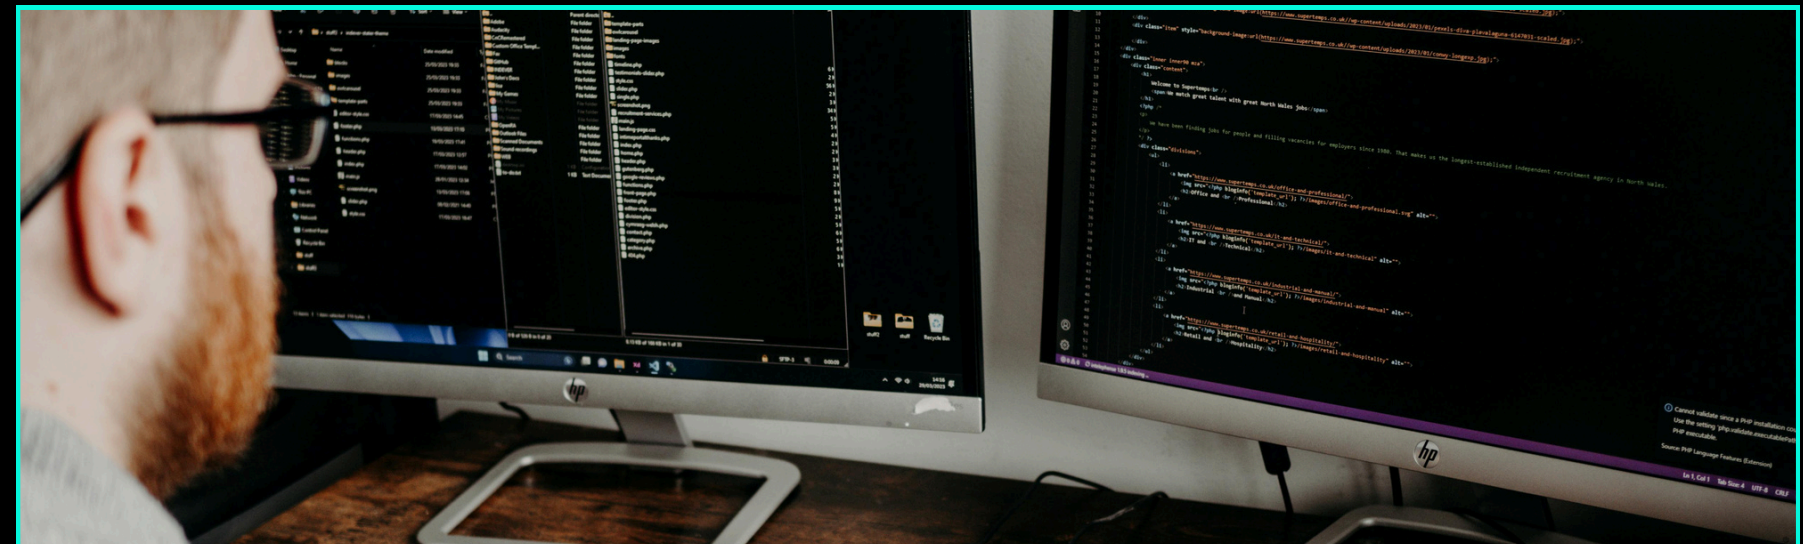

- Visual Studio Code
- Git
- GitHub

Deployment & Services

- GitHub Pages
- EmailJS

Design & Content

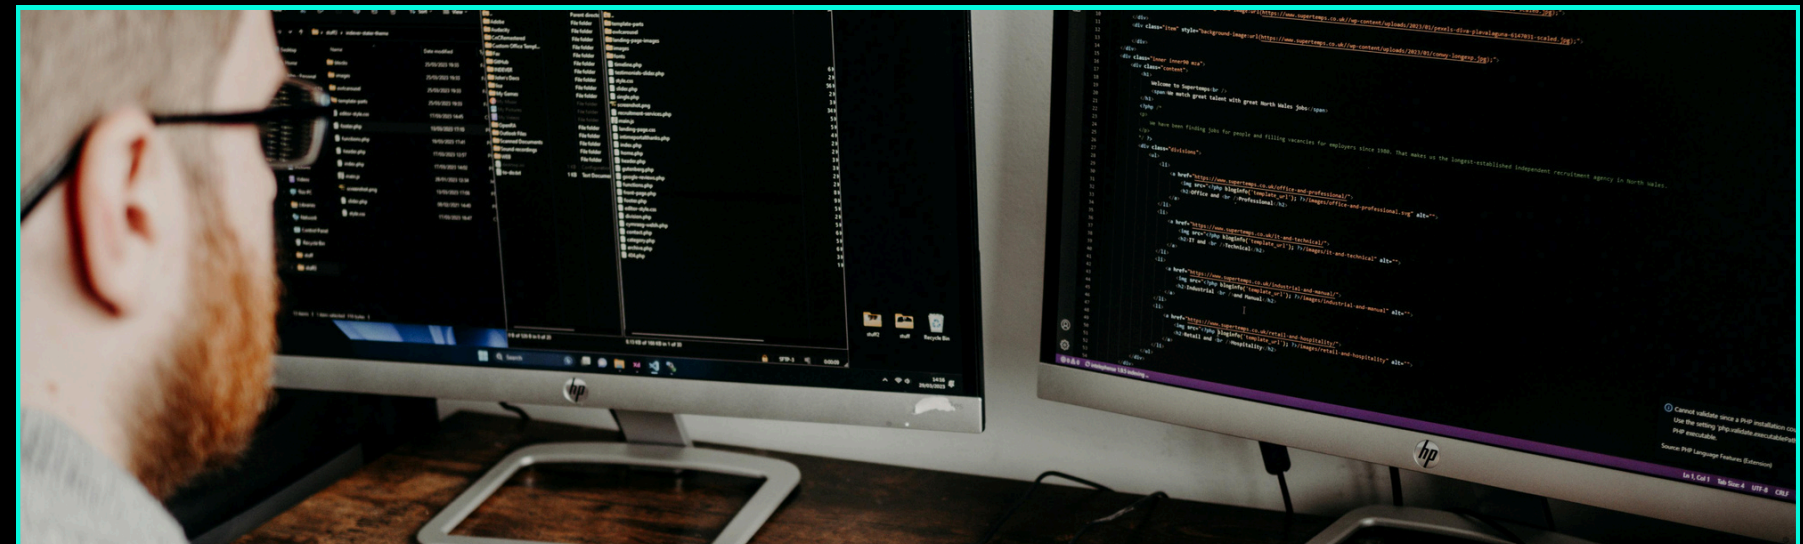

- Canva
- Microsoft Copilot (including images)

KEY DESIGN DECISIONS

Powering the Website Behind the Scenes

- **Sticky navbar** for intuitive navigation.
- **Bootstrap Grid and Flexbox** for responsiveness.
- **Sass** for reusable and maintainable styling.
- **Consistent page structure** across the website.
- **Custom logo** to strengthen personal branding.
- **EmailJS integration** for direct contact without backend development.
- **Mobile-first approach** to ensure accessibility on all devices.

MY HOME PAGE

The **Home page** introduces my professional identity through a **custom logo, profile picture, biosketch and key skills**. It provides visitors with a **concise summary of my background** in research, scientific documentation and emerging digital technologies.

Filippo La Greca, PhD

Neuroscience Researcher | Technical and Administrative Support | Technology Enthusiast

Passionate about neuroscience, technology, and process improvement

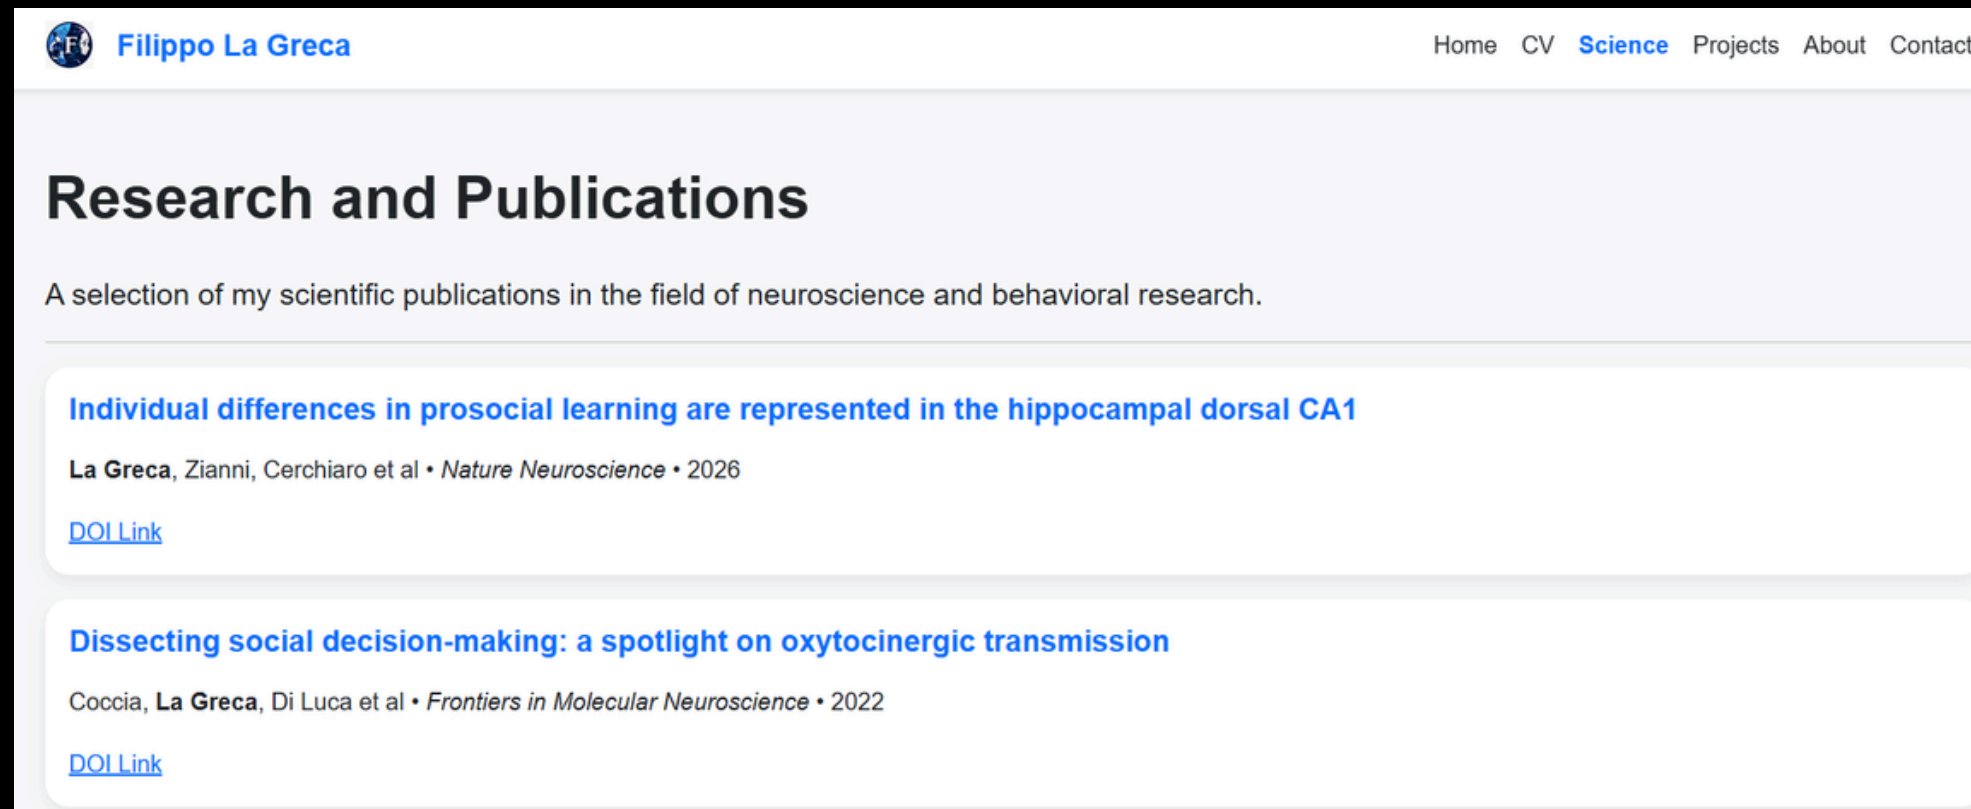

CV PAGE

From Idea to Live Website

The **CV page** provides a structured overview of **my academic background, professional experience, technical skills and achievements**. It highlights my expertise in research support, scientific documentation, compliance-related activities and ongoing development in data, AI and digital technologies.

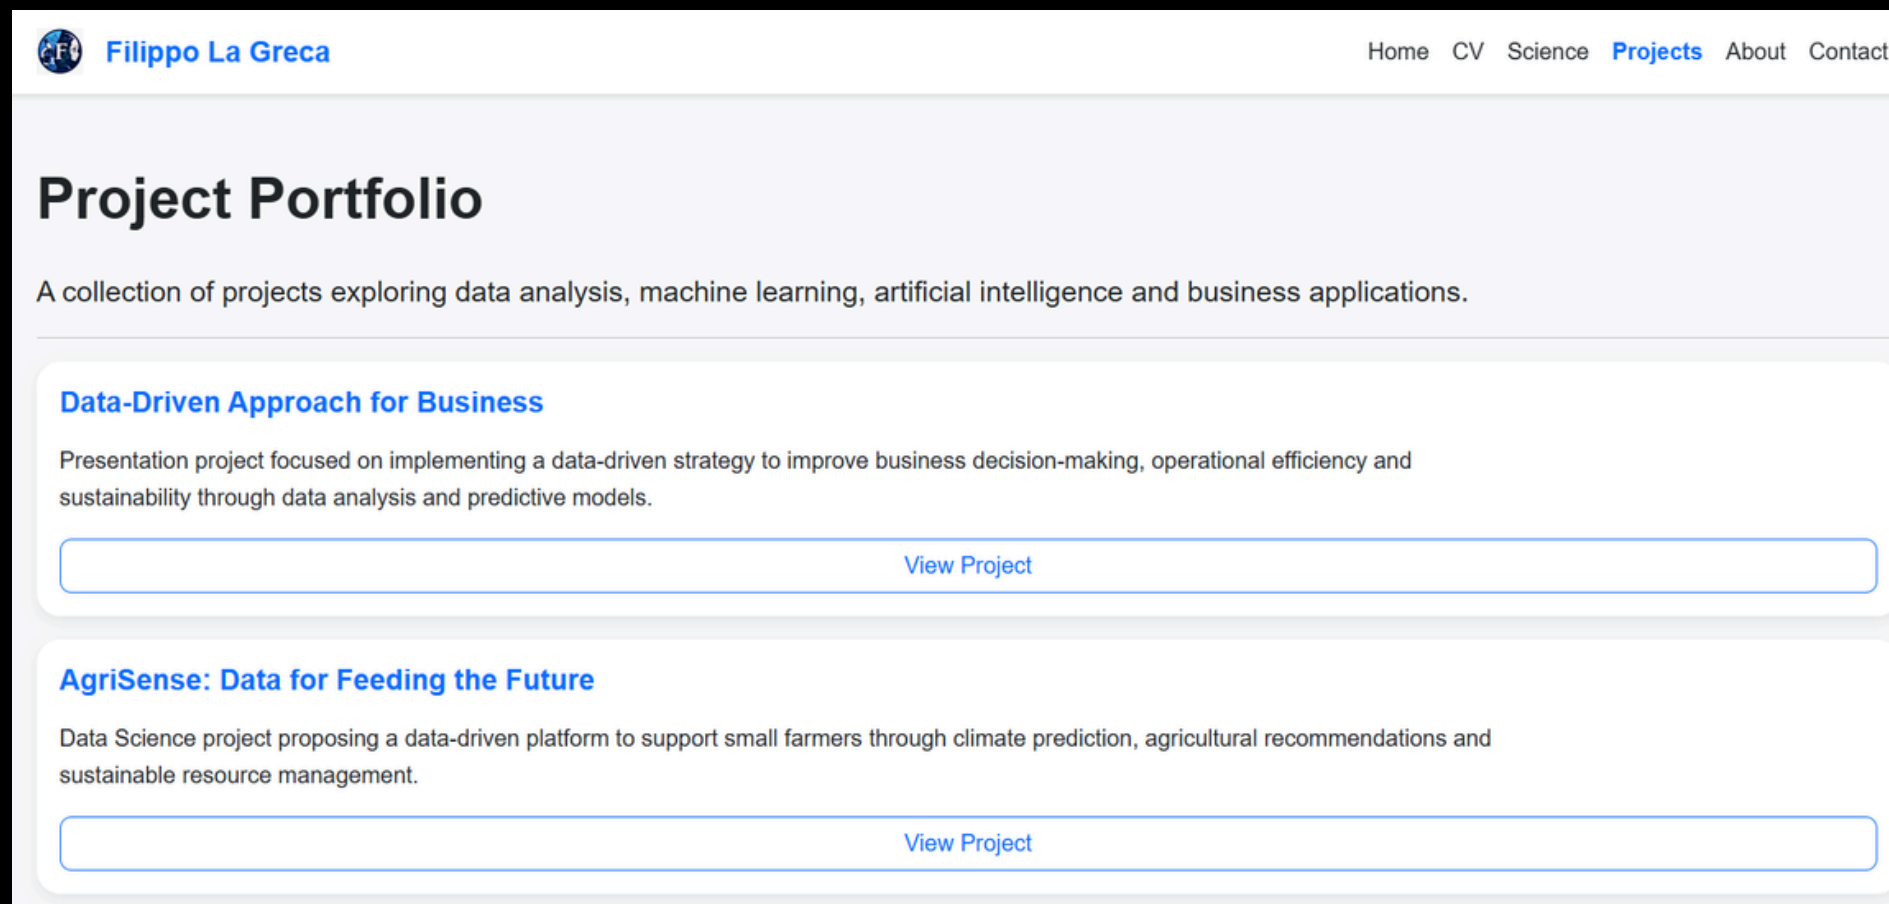

SCIENCE PAGE

From Idea to Live Website

The **Science page** presents my **scientific publications**, providing an overview of my contributions to **neuroscience** and direct access to my complete **publication record**.

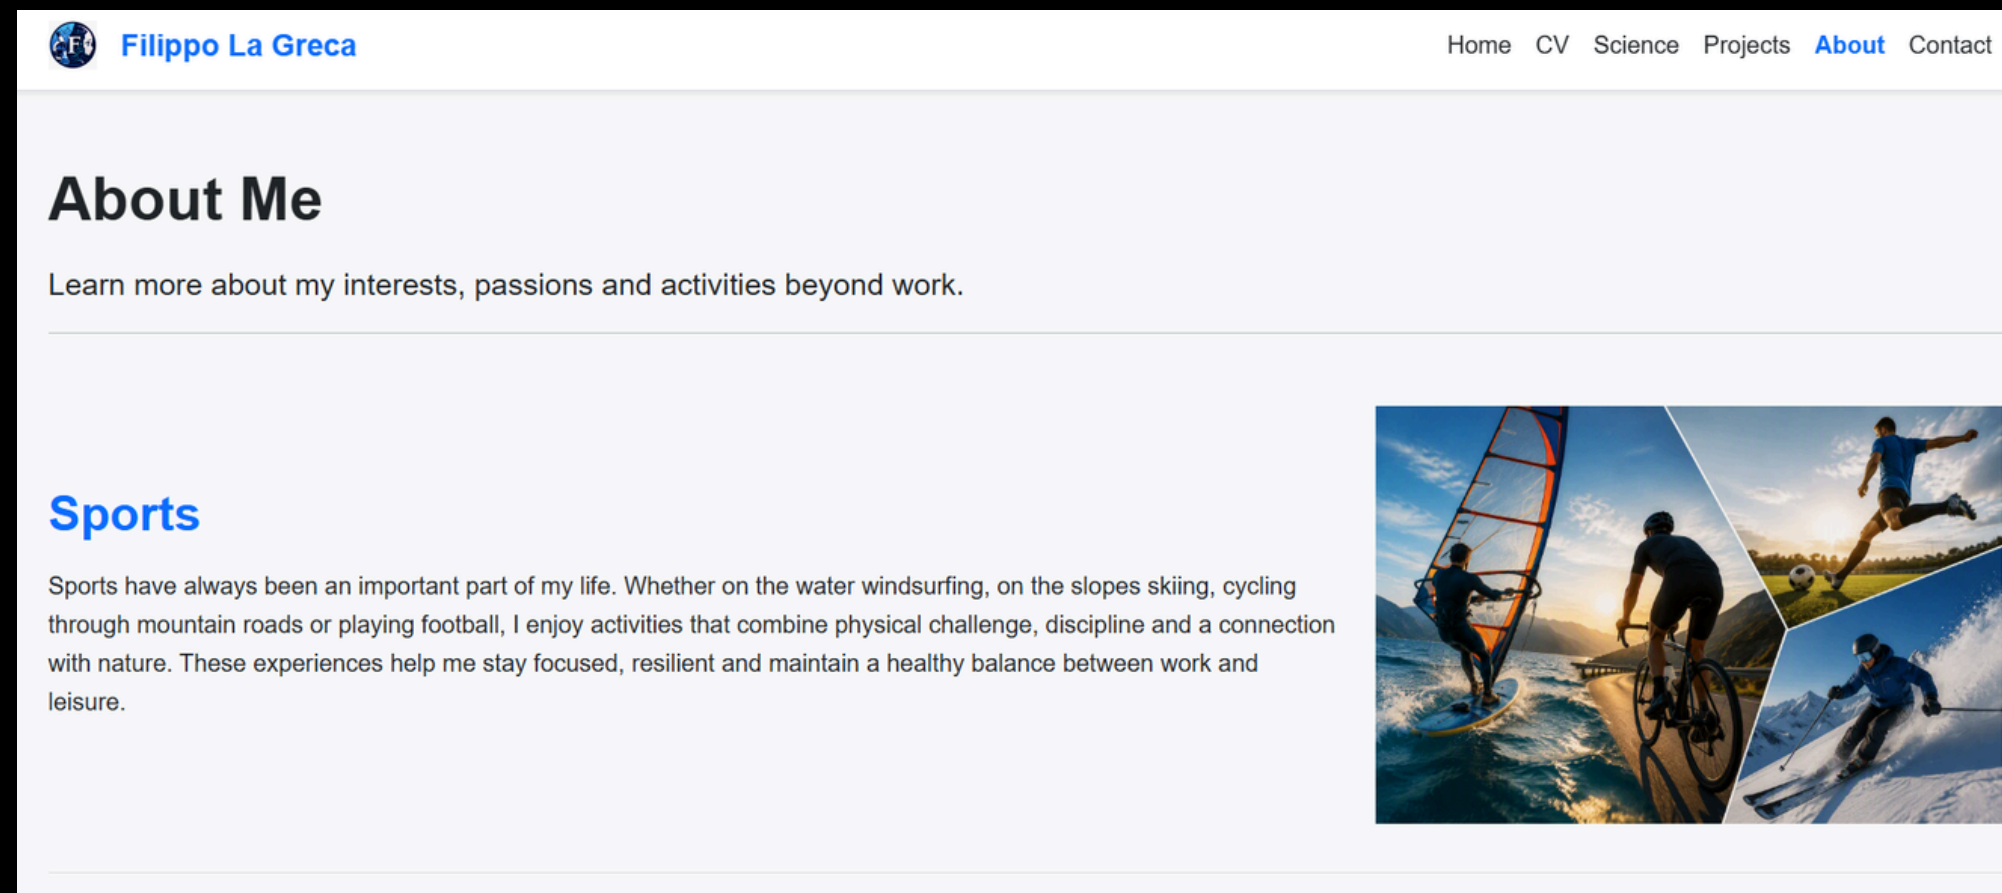

PROJECT PAGE

From Idea to Live Website

The **Projects page** presents **selected projects** completed during the **Master's program in AI and AI Agents for Business**, showcasing practical applications of **data analysis, machine learning and web development**.

ABOUT PAGE

From Idea to Live Website

The **About page** offers a **personal perspective** beyond my professional background, **highlighting key interests such as sports, reading, comics, anime and music**, which contribute to my curiosity, creativity and continuous learning.

CONTACT PAGE

Home CV Science Projects About **Contact**

Contact Me

Feel free to get in touch for professional collaborations, research-related opportunities, or discussions about technology, data and AI.

Name

Email

Subject

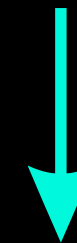

Message

From Idea to Live Website

The **Contact page** features a **responsive contact form** with **EmailJS integration**, providing **a direct way to connect** for professional and research-related opportunities.

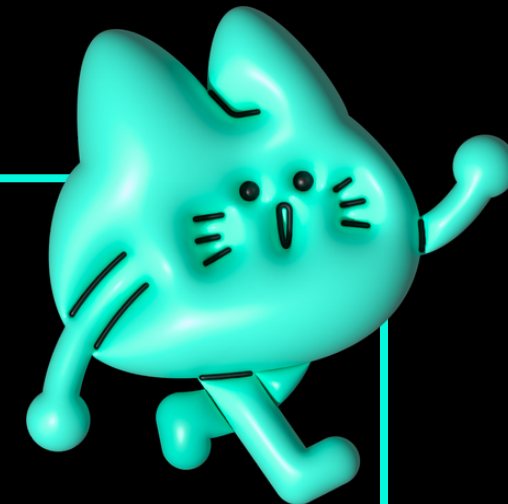

CONCLUSIONS

This project allowed me **to combine my background** in research and scientific communication **with newly acquired skills** in web development and digital technologies.

The result is a **fully responsive portfolio website** that showcases both my **professional experience** and my **ongoing learning journey** in data, AI and digital technologies.
